Electricity study guide. STUDY. PLAY. Light. Electricity energy can be changed to light energy with light bulbs in lamps, televisions, and computer monitors. Heat. Electricity energy can be changed to heat energy in stoves, toaster, and ovens.

Electricity study guide Flashcards | Quizlet

Electricity acts as if all matter were divided into four categories: Superconductors, which allow current to flow with no resistance. (However these have only been produced in relatively extreme laboratory conditions, such as at temperatures approaching absolute zero) Conductors, which allow electric current to flow with little resistance.

historical contributions in understanding electricity. CIRCUITS. A continuous flow of negative charges (electrons) creates an electric current. The pathway taken by an electric current is a circuit. Closed circuits allow the movement of electrical energy.

SOL 4.3 Electricity - Standards

Insulators (rubber, plastic, wood) do not conduct electricity well. Among conducting materials, the rate at which energy flows depends on the material's resistance. Rubbing certain materials together

creates static electricity. • Lightning is the discharge of static electricity in the atmosphere.
