Global 500 Climate Change Report

Overwhelming scientific consensus says human activity is primarily responsible for global climate change. The 2010 Anderegg study found that 97-98% of climate researchers publishing most actively in their field agree that human activity is primarily responsible for global climate change.

Climate Change ProCon.org

Climate change denial, or global warming denial, is part of the global warming controversy. It involves denial, dismissal, or unwarranted doubt that contradicts the scientific opinion on climate change, including the extent to which it is caused by humans, its impacts on nature and human society, or the potential of adaptation to global warming by human actions.

Climate change denial - Wikipedia

Scientific opinion on climate change is a judgment by a scientist, or by group of scientists, regarding the degree to which global warming is occurring, its likely causes, and its probable consequences.. Although most climate scientists concur with the scientific consensus described below, dozens of individual climate scientists, professional associations, and research programs have ...
