The economic analysis of projects goes back at least to the 1930's with the evaluation of U.S. federal water development projects. Since that time, economic analysis has been integrated into the decision making process of most if not all U.S. federal agencies and influenced issues ranging from nuclear power to environmental regulation.

Structured analysis and design technique (SADT) is a systems engineering and software engineering methodology for describing systems as a hierarchy of functions. SADT is a structured analysis modelling language, which uses two types of diagrams: activity models and data models. It was developed in the late 1960s by Douglas T. Ross, and was formalized and published as IDEF0 in 1981.
