The purpose of this article is to describe our current understanding of where, how, when, and why natural diamonds have been formed. This article reviews currently accepted areas of knowledge, along with topics that are still the subject of ongoing research, where science does not yet have all the answers.

Recent Advances in Understanding the Geology of Diamonds ...

History. After its beginnings in the 8th century based on Hellenistic geography, Islamic geography was patronized by the Abbasid caliphs of Baghdad. Various Islamic scholars contributed to its development, and the most notable include Al-Khwārizmī, Abū Zayd al-Balkhī (founder of the "Balkhi school"), and Abu Rayhan Biruni.. Islamic cartographers inherited Ptolemy's Almagest and Geography in ...

The Deccan Plateau is a large plateau in western and southern India. It rises to 100 metres (330 ft) in the north, and to more than 1,000 metres (3,300 ft) in the south, forming a raised triangle within the South-pointing triangle of the Indian subcontinent's coastline.. It extends over eight Indian states and encompasses a wide range of habitats, covering most of central and southern India.

Question SB1 (historical geology - Quaternary) In which stage of the Pleistocene did the cutting of the deep river channel most probably occur?(hint - it was quite late!). Suggest a date BP (before the present) to the nearest 2ka (2000 years) for the flooding of channel during the Flandrian (hint - not at the beginning of the Flandrian Transgression because the channel floor is too high).

"I used The Lizard Evolution Virtual Lab as we researched the concepts of evolution and natural selection in my 10th grade biology class. The Lizard Evolution Virtual Lab applies central concepts and vocabulary to a real-life scenario to provide students an experience in doing real science.

Lizard Evolution Virtual Lab | HHMI BioInteractive

Biology is often approached on the basis of levels that deal with fundamental units of life. At the level of molecular biology, for example, life is regarded as a manifestation of chemical and energy transformations that occur among the many chemical constituents that compose an organism. As a result of the development of increasingly powerful and precise laboratory instruments and techniques ...
