Implant Dentistry is one of the most dynamic and rapidly developing areas within oral health care. In spite of increasing popularity of implantology, it is a relatively new discipline within dental education and remains limited to post-graduate courses offered by dental schools in many parts of the world today.

Implant Dentistry | Coursera

Background. The purpose of this study is to use 3-dimensional printing (3DP) polyetheretherketone (PEEK) implants for skeletal reconstructions after wide excision of chest wall. 3DP PEEK implants were expected to provide a better physiological simulation than traditional ones because of a closer elastic modulus to cortical bone and similar biomechanical properties.

The Encode Impression System - Biomet

Peri-implantitis is a destructive inflammatory process affecting the soft and hard tissues surrounding dental implants. The soft tissues become inflamed whereas the alveolar bone (hard tissue), which surrounds the implant for the purposes of retention, is lost overtime. The bone loss involved in peri-implantitis differentiates this condition from peri-mucositis, a reversible inflammatory ...
