Solar Energy Problems And Solutions

When it comes to our energy needs, there are three main problems. We have confused needs and desires, cheap energy and not educated ourselves enough on understanding energy. Let me explain. Need is a word that gets used out of context all the time, it falls into the category of words like have to ...

Solar Energy: What is the Problem and What is the Solution

Solar power makes up a tiny fraction of all power produced in North America, even though there are vast regions of the continent where there is an abundance of sunshine. To harvest more of this free energy, we need to discover new materials, develop new production techniques and solve the problem of storing energy when the sun isn't shining.

Energy storage. But solutions are molten salt and batteries. That's why Elon Musk made PowerWall. Some CSPs (Concentrated Solar Power facility) use molten salt storage system to preserve the heat stored in giant silos. Two examples of that would be Andasol Solar Power Station and PS10 solar power plant so it provides electricity 24/7.; Huge CSP (currently Ivanpah is the largest) can be ...
