Festphasenmikroextraktion (englisch solid phase microextraction, SPME) ist eine Methode der Probenahme und Analytenanreicherung, welche sich in einigen Bereichen der chemischen Analytik als vorteilhaft gegenüber klassischen Methoden wie z. B. "Purge and Trap" oder SPE (Solid Phase Extraction, Festphasenextraktion) erwiesen hat. Sie wurde von Janusz Pawliszyn seit 1990 entwickelt.

### **Festphasenmikroextraktion - Wikipedia**

In a GC analysis, a known volume of gaseous or liquid analyte is injected into the "entrance" (head) of the column, usually using a microsyringe (or, solid phase microextraction fibers, or a gas source switching system). As the carrier gas sweeps the analyte molecules through the column, this motion is inhibited by the adsorption of the analyte molecules either onto the column walls or onto ...

Surfactants have been used in sample preparations for both organic and inorganic compounds (1). They can play the role of an emulsifier, a micellar extraction medium, and an ion-pairing agent for extraction, or a more complicated role such as in surfactant-coated magnetic nanoparticle separations.

An optimized chromatographic separation begins with the column. The selection of the proper capillary column for any application should be based on four significant factors: stationary phase, column I.D., film thickness, and column length. The practical effects of these factors on the performance of the column are briefly discussed below, in order of importance.

Electron ionization (EI, formerly known as electron impact ionization and electron bombardment ionization) is an ionization method in which energetic electrons interact with solid or gas phase atoms or molecules to produce ions. EI was one of the first ionization techniques developed for mass spectrometry. However, this method is still a popular ionization technique.

### **Electron ionization - Wikipedia**

The performance of the charged aerosol detector (CAD) was investigated using a diverse set of 29 solutes, including acids, bases and neutrals, over a range of mobile phase compositions, particularly with regard to its suitability for use in hydrophilic interaction chromatography (HILIC).

About the Conference. We take pleasure to announce "Global Chemistry Congress (GCC 2019)" scheduled on June 10-12, 2019 in Rome, Italy. GCC 2019 aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Chemistry and related fields.
