Structural Investigation Of Historic Buildings

Four important preservation principles should be kept in mind when undertaking seismic retrofit projects: Historic features and materials, both structural and nonstructural, should be preserved and retained, not as museum artifacts, but to continue to fulfill their historic function to the greatest extent possible, and not be replaced wholesale in the process of seismic strengthening.

The Seismic Rehabilitation of Historic Buildings

Ian Hume, a former chief engineer for English Heritage, explores some of the less expensive, low-tech methods that can be used in the structural investigation and assessment of masonry structures. His article also looks briefly at the questions raised by investigative work and, when defects have been identified, how to source the appropriate specialist expertise to address them.

Masonry Structures: Structural Investigation and Assessment

Structural engineer Michael Bussell explains the highly significant but often overlooked role of structural ironwork in 19th century British architecture, exploring its uses and properties, and detailing current best practice in assessing, repairing and maintaining structural cast and wrought iron elements as well as the relevant fire protection issues

19th-century Structural Ironwork in Buildings ...

Overlooking the C&O Canal, the Washington, DC, office of Silman is an informal yet highly professional working environment. Its central location in historic Georgetown, near some of the city's best restaurants and shops, makes the office a highly desirable place to work.

Shingles: Wood shingles were popular throughout the country in all periods of building history. The size and shape of the shingles as well as the detailing of the shingle roof differed according to regional craft practices. People within particular regions developed preferences for the local species of wood that most suited their purposes.

Preservation Brief 4: Roofing for Historic Buildings

FindanEngineer.com - FindanEngineer.com is a comprehensive database of structural engineering practices across the UK that puts you in touch with the best structural engineer for any project. Only firms that have at least one member from the Institution of Structural Engineers can register.
