Structure is an arrangement and organization of interrelated elements in a material object or system, or the object or system so organized. Material structures include man-made objects such as buildings and machines and natural objects such as biological organisms, minerals and chemicals. Abstract structures include data structures in computer science and musical form.

Structure - Wikipedia

In mathematics, a structure on a set is an additional mathematical object that, in some manner, attaches (or relates) to that set to endow it with some additional meaning or significance.. A partial list of possible structures are measures, algebraic structures (groups, fields, etc.), topologies, metric structures (), orders, events, equivalence relations, differential structures, and categories.
