

The Typographic Grid

The Typographic Grid

The International Typographic Style, also known as the Swiss Style, is a graphic design style that emerged in Russia, the Netherlands, and Germany in the 1920s and was further developed by designers in Switzerland during the 1950s. The International Typographic Style has had profound influence on graphic design as a part of the modernist movement, impacting many design-related fields including ...

In graphic design, a grid is a structure (usually two-dimensional) made up of a series of intersecting straight (vertical, horizontal, and angular) or curved lines (grid lines) used to structure content. The grid serves as an armature or framework on which a designer can organize graphic elements (images, glyphs, paragraphs, etc.) in a rational, easy-to-absorb manner.

A modular grid has consistent horizontal divisions from top to bottom in addition to vertical divisions from left to right. These modules govern the placement and cropping of pictures as well as text. In the 1950s and 1960s, Swiss graphic designers including Gerstner, Ruder, and Müller-Brockmann devised modular grid systems like the one shown here.

The most recent font format emerged at the beginning of the new millennium. OpenType was initially developed by Microsoft, which were later joined by Adobe. In a few years time it has become the new standard format for digital fonts. The biggest advantages shared by all OpenType fonts are their single file structure, cross-platform compatibility, and advanced typographic functionality.
